

DEPARTMENT OF APEX INSTITUTE OF TECHNOLOGY

PROJECT PROPOSAL

1. Project Title :- HireMe: A Platform For Job Seekers

2. Project Objective :-

We are focused to create a user friendly ui based dashboard for the future aspirants so that they can pursue their dream job in the current industrial scenario.

3. Project Description:-

- **Historical Job Analysis Platform:** Create a web and mobile app that leverages Power BI for in-depth analysis of past job trends and data. Users can explore historical job market information, including skills demand, salary fluctuations, and industry shifts.
- **Data Visualization with Power BI:** Integrate Power BI to develop interactive and informative dashboards, providing users with a visual representation of job market dynamics over time. Enable users to customise data queries for specific insights.
- **User-Focused Analytics Interface:** Develop a user-centric interface that allows individuals, researchers, and professionals to access and interpret historical job data effortlessly. Prioritise usability, data accuracy, and responsive design for seamless access across devices.

4. Requirements:-

- Power BI
- Android Studio (JAVA)
- Web Dev

STUDENTS DETAILS

Name	UID	Signature
ANIKET KUMAR	20BCS6582	
BITAN PAUL	20BCS6515	
ANUJ KUMAR SINGH	20BCS6544	
Sanskriti Mehta	20BCS6529	

APPROVAL AND AUTHORITY TO PROCEED

I approve the project as described above, and authorise the team to proceed.
